Flowise Scientific

15.3.13

I just wanted to drop you a note of thanks for the recent training Flowise Scientific conducted for us at the MRC Unit in The Gambia.

As we already experienced last year, the training was of the highest quality and really tailored to the needs of our students. Flowise had made the perfect organisational plan and there was time to go over basic principles again but also for individualised sessions to discuss the development of multi-colour tailored panels, making it very timely for the team and completely up to date regarding instruments, reagents and recent scientific developments.

All participants agreed that we would love to have you back next year, if at all possible, to make us even more flow-wise!!

Once again, on behalf of the team, many thanks and

Best wishes from the MRC Unit in The Gambia,

A handwritten signature in black ink, appearing to read 'Beate Kampmann', written in a cursive style.

Beate Kampmann

Head of Vaccinology Research, MRC Unit-The Gambia
